

## Sprint 3 Report

**Product Name:** BananaStocks

**Team Name:** Stocks Team

**Date:** May 16th, 2021

### **Actions to stop doing**

We want to make sure everyone is aware of the meeting times with our TA every week because of different time zones. We want to stop delaying reviews of PRs so that we can make sure the application works early on.

### **Actions to start doing**

We want to start developing additional features to our MVP and choosing/finding better styles for our application. We want to start having PRs be reviewed early and by the person designated on that particular service. We want to keep communicating our availability before a meeting.

### **Actions to keep doing**

We want to keep our communication between every person integrated as we have been doing. We have been integrating each person's work on the separate services onto the final product design through this communication. We also want to provide constant updates and summaries when we want code to be merged.

### **Work completed/not completed**

User Stories Completed

As a developer, I should organize our training data (articles, prices, etc) of stocks into datasets.
As a developer, I should train our NLP model.
As a developer, I should implement several Open Authentication methods
As a developer, I should be able to display stock data on a chart from our models

As a developer, I should implement account deletion and password changes for users.

User Stories Not Completed  
None

### Work completion rate

**Total number of user stories completed during the prior sprint:** 5 user stories completed

**Total number of estimated ideal work hours completed during the prior sprint:** 40 hours

**Total number of days during the prior sprint:** 14 days

**For the previous sprint, the user stories/day and ideal work hours/day figures should be reported:**

~1 user story/3 days

~3 work hours/day
