

Sprint 2 Report

Product Name: BananaStocks

Team Name: Stocks Team

Date: April 30th, 2020

Actions to stop doing

Although we have consistently been meeting 3x/week, sometimes the timing is off. So we want to stop having moved meeting times so that it is easier to remember for everyone and easier on everyone's schedules.

Actions to start doing

We want to start having more consistent meeting times. We also want to push to have our MVP done somewhere within this sprint so that we can add more cool features that we want to have.

Actions to keep doing

We want to keep up with having 15 minutes scrum meetings 3x/week. We also want to keep making sure we are completing our user stories within the sprints so that we don't fall behind, all the while still maintaining quality code and documentation.

Work completed/not completed

User Stories Completed

As a developer, I should develop an API endpoint to service a request from a user to return their relevant stock information.
As a customer, I should be able to interact with the landing page and see relevant stock data.
As a developer, I should authenticate user requested stocks as valid through an API call
As a developer, I should store the necessary data to analyze and present to the user

As a developer, I should
implement refresh tokens and
Google OAuth

As a customer I should see the
behavior(negative or positive)
of every news source

As a customer I should be able
to check past news sources with
predictions for stock analysis

User Stories Not Completed
None

Work completion rate

Total number of user stories completed during the prior sprint: 5 user stories
completed

**Total number of estimated ideal work hours completed during the prior
sprint:** 50 hours

Total number of days during the prior sprint: 14 days

**For the previous sprint, the user stories/day and ideal work hours/day
figures should be reported:**

~1 user story/4 days

~4 work hours/day

The final sprint burnup chart for the previous sprint:
